

Year 7 ART

Curriculum Intent: The aim of Art & Design is to create independent learners and equip them with a broad range of experiences and skills and the ability to apply them thoughtfully, growing into reflective and critical thinkers. Students will be exposed to a large range of artists, styles and movements from historical and contemporary contexts and will be able to apply prior knowledge and understand the broad range of careers available to them, in the Art industry.

CONTENT / KNOWLEDGE:

- The Elements of Art, their definitions and how to execute them
- The grid method and becoming proficient in using it
- Colour theory, colour psychology and colour schemes
- Abstract art using colour and shape
- How to analyse an artist's work
- Research into Kandinsky and using music as a stimulus for creativity

SKILLS:

- ❖ How to use your pencil and various pressures to create a variety of tones
- ❖ How to use the grid method in order to recreate an image photo-realistically
- ❖ How to analyse other artist's and their own work
- ❖ How to mix colours to create secondary and tertiary colours
